manned by some of the  
best technicians in the water  
tower & tank cleaning industry!*

100%  
Frictionless

# Water Tower Cleaning *Done Right!*

Professional Cleaning Today = Considerable Savings Tomorrow

## On the CUTTING EDGE of Water Tower & Tank Cleaning

We always consult with engineering companies and paint manufacturers to ensure all safety and proper cleaning methods are applied by their recommendations.

With our pre-soak system of biodegradable cleaning agents and an application of anti-mildew inhibitor after the cleaning, water tanks can stay free of mildew stains for 3 to 5 years depending on the tank's surrounding atmosphere.

*Dramatic results done right the first time!*

## Service & Performance Features:

- Completely 100% frictionless.
- No cables, wheel baskets or fancy hanging devices that rub or scratch the tank's painted surfaces.
- Only qualified products and the safest **Soft Wash\*** methods are used on every job performed.
- Our employees are trained with the products that we use by attending our educational and supplier support classes.

*\*See pages 4 and 5 for more info.*

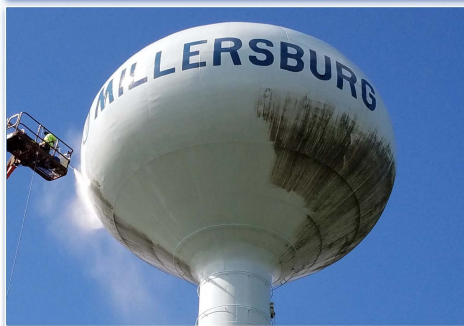

## FACT:

Cutting edge knowledge, 100% frictionless procedures, and a 3-step cleaning and flushing process combine to achieve a very important goal:

***To Save The Paint & Clean For Less!***

# Soft Wash Method Valuable Benefits

Treat Your Tower or Tank To The Safest & Most Modern Cleaning Method!

## **At A Glance:** The Numerous Benefits of Our *Soft Wash* Safe Cleaning Method

- No trail marks left behind.
- No high pressure psi used.
- No hot water (steam) cleaning.
- We use a soft flushing method, not a harmful blasting method.
- Safer application means less employee fatigue at aerial work.
- The biodegradable cleaning products we apply are environmentally friendly and deliver exceptional results.

## **FACT:**

National Wash Authority takes the safety of our technicians seriously, which is why we carry an

**OSHA 10 Certification**

4

**SAFE**  
And Effective!

# The Hard Facts About Soft Washing

**What You Don't Know About Water Tower & Tank Cleaning Could Cost You.**

After twenty eight years of service, we have seen and experienced many different methods of cleaning water storage tanks & towers that involve mildew removal.

**It seems most companies' concept in the tank cleaning business is to just "blast away" the grime and mildew stains.** With water storage tank paint jobs costing hundreds of thousands of dollars, you want to yield the longest possible time between painting applications.

**Our "Soft Wash Method" uses less than 1,200 psi** (avg. 800 - 1,200 psi) water pressure. For a comparison example, most self-serve car wash bays operate at 1,100 psi to 1,500 psi.

**No high pressure washing or blasting is required** to remove ugly mildew stains from the tank's painted surface.

This **Soft Wash** and low psi method flushes off dirt, grime, and mildew stains while minimizing the high pressure washing damage risk to yield a long life for tank paints.

## **FACT:**

Enjoy priceless peace of mind knowing when you hire National Wash Authority you are working with an **Aerial Lift Certified** company with **an incident-free record.**

# Logo Painting & Other Services

**1 STOP**
